Instead, students can rely on the use of logical and oral reasoning skills to correctly answer questions. Techniques for solving Synonyms/Antonyms Questions 1) In the toughest synonym/antony questions, watch out for trick options. Can you locate the trick in the following example? Pick the best antony. RESTIVE: A) patient B) strict C) misleading D) active E) careful The word, comfortable, is difficult, because it sounds like it has something to do with rest. Therefore, D) active would be the best antony. However, this is a trick. Retive means really anxious. So the right answer is weak, a good antony for restless. It is beneficial to familiarize yourself with difficult words such as upset, because they are usually tested for SAT and GRE. 2) Note the positive and negatively charged response options. It is possible to associate a negative or positive charge with almost any given word. Try to tell if each word in the list below has a positive (+), negative (-) or neutral (=) charge. Choose the best synonym. MALIGNED: A) beneficial B) magnanimous C) oppressed D) destitute E) elegant In the example, we try to find the best synonym for the word spoiled. So we'll have to start by verifying his accusation. The prefix, mal is usually used in negatively charged words. Therefore, the answer will probably have a positive burden. Let's see how each word is charged. A) beneficial (+) B) magnanimous (+) C) oppressed (-) D) destitute (-) E) elegant (=) After labelling each, we are left with two words that are positively charged: beneficial and magnanimous. Even if you don't know the meaning of any answer options, you've narrowed your options down to two and left with a 50% change of response correctly. This is a quick technique that can be very beneficial when you try to answer a question with several words that you are sure of. 3) Eliminate answer options that do not have clear antonym. This technique only works on antonym questions. So this is a great technique for use in GRE because it contains only antonym questions (it does not contain synonym questions). Consider the words rounded or striped. None of these words have a clear antony. While almost every word has a synonym, remember that not all and eliminate them first. 4)

Eliminate answer options that are narrow synonyms. Identifying aliases within answer options can be valuable because it allows you to limit your sustainable response choices. If if you of the answers have very similar meaning, then the correct answer is very ambiguous. Therefore, it is possible to eliminate these options. The SAT/GRE are tough tests, but always present an answer option that is clearly correct. See if you can eliminate two answer options from the following example. Pick the best antony. FOMENT: A) moderate B) give birth C) control D) soften E) fill Words temper and soften are closely synonymous. Both mean to reduce or soften in pain or tension, to make it less severe. This leaves only three more viable answer options. 5) Try to associate the word with a familiar context. The words for SAT/GRE are tested for good reason: they are very effective. In these cases, they are included in many proverbial phrases. Note the following examples: Gail Force Winds, The Village Advocate, Test Your Courage, Road to Perdition, Patience is a Virtue, Miserable Poverty, Made In Unscathed. 6) Use your knowledge of Romance languages. The roots of many SAT/GRE words have similar meanings in foreign languages. For example, the Spanish word malo means evil. This is a common root for many negatively charged words: spoiled malignant malapropos malegiction malicious. In addition, the Spanish word bueno means good. This is also a common root for many positively charged words: blessing beneficial benevolent benefactor benign But, be careful. Sometimes the questions will try to fool the taster by including the roots in words that disprove their true meaning: bellicose restive noisy pious fulsome informative craven precipitate prosaic prosaic
